Engaging with Difference Matters: Longitudinal Student Outcomes of Co-Curricular Service-Learning Programs

The potential contribution of co-curricular service-learning to develop engaged citizens is relatively unexplored. Much of the available research on college-level service-learning has studied the effect of service-learning in single courses on a variety of student outcome measures and there are at least two large, multi-campus studies of curricular service-learning (Astin, Vogelgesang, Ikeda, & Yee, 2000; Eyler & Giles, 1999). This article reports on analysis of longitudinal surveys completed at 23 liberal arts colleges by participants in four-year, co-curricular service-programs, collectively called the Bonner Scholar Program, sponsored by the Bonner Foundation.

The terms "service-learning" and "civic engagement" merit definition. The National Service-Learning Clearinghouse (2005) defined service-learning as a "teaching and learning strategy that integrates meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities." A frequent tendency in the field is to use the phrase *service-learning* and assume the reference is to *academic service-learning* based in coursework. Giles and Eyler's (1999) seminal study of programs that linked academic study with service acknowledged the value of co-cur-

We thank Tom Plaut and the staff at CARA of Mars Hill College for their consultation and coding of the surveys and Sacha Ramirez and Jim Keen for their work preparing annual surveys and reports leading to the longitudinal study.
