

# MASTER OF ENVIRONMENTAL SUSTAINABILITY

Develop the skills you need to implement policies and advocate for change at the intersection of humans and the environment. Through our one-year program, you'll get science training, management, and technical skills to prepare you to meet the growing demand for green jobs across the nation. You'll be guided by world-renowned faculty who are experts and leading researchers in their fields, resulting in an experience that is practical, relevant, and a powerful building block for your future career.

## TAILOR YOUR DEGREE

Outside of the core curriculum—which emphasizes environmental and project management and critical thinking skills—courses are tailored to your interests. Customize your degree through one of four concentrations designed around topics that are in demand and highly sought after by employers.

- Environmental Quality and Toxicology
- Municipal Sustainability
- Sustainable Water Resources
- Sustainable Natural Resource Conservation and Management

**O'NEILL**  
SCHOOL OF PUBLIC AND  
ENVIRONMENTAL AFFAIRS

### EXPERIENTIAL LEARNING

As part of your capstone project during your final semester, you'll get the chance to solve a complex problem for a real-world client. This practical, hands-on experience delivers a deeper understanding of environmental sustainability issues and better prepares you to step into a leadership role when you graduate.

### EMPLOYMENT SECTOR TARGETS

- Agencies, municipalities, parks, and utilities
- Environmental nonprofits
- Environmental consulting firms

*"At O'Neill, we've been training students to protect our environment for five decades. We're proud of our programs and gratified by the steady growth shown over the years, both in reputation and in the number of students served. The world needs a new generation of leaders—dedicated individuals with the talent, the training, and the tools to reshape Earth's future."*
